APPROVED IN THE CITY OF TUPELO
FOR STORMWATER APPLICATIONS

BLUE STRIPE: LEADING THE WAY.

See details inside.

TUPELO MISSISSIPPI PUBLIC WORKS APPROVES HANCOR SURE-LOK PIPE FOR PUBLIC STORM SYSTEMS

ENGINEERED TO OUTPERFORM

SUPERIOR ENGINEERING:

Sure-Lok pipe provides the strength needed for tough applications. It offers abrasion resistance and won't rust or corrode like concrete or steel.

ADVANCED DRAINAGE APPLICATIONS:

Sure-Lok pipe is used for cross drains, side drains, storm sewers, culverts, landfills and other installations across the country. It's available in a wide range of sizes from 4" to 60" diameters for flexibility in all your projects. Sure-Lok pipe meets the Tupelo, Mississippi requirements of ASTM F2306 and AASHTO M294.

EASY INSTALLATIONS:

Its rugged, lightweight design makes Sure-Lok easier and more cost-effective to install. It requires fewer people, less time and less heavy equipment to install compared to concrete pipe installations. It all adds up to lower installation costs.

Hancor Sure-Lok Corrugated High Density Polyethylene (HDPE) pipe offers top-performance for drainage systems. The Tupelo, Mississippi Department of Planning and Community Development now approves the use of Hancor Sure-Lok pipe for storm sewer applications behind the curb and yard drains.

HIGH PERFORMANCE JOINTS:

Hancor Sure-Lok and Blue Seal® pipe are available with both soil-tight and water-tight joints that meet or exceed ASTM standards.

OUTSTANDING VALUE:

Sure-Lok pipe has many performance advantages over traditional pipe... at a fraction of the cost.
