

CITY OF CHANDLER APPROVES NEW ADS SANITITE® HP (HIGH PERFORMANCE) SANITARY SEWER PIPE

ENGINEERED TO OUTPERFORM

A new addition to the ADS product line, SaniTite® HP (High Performance) corrugated polypropylene pipe offers top-performance for municipal sanitary sewer systems. SaniTite HP pipe offers higher beam strength, higher pipe stiffness and dramatically improved joint performance. The City of Chandler, Arizona now approves the use of ADS SaniTite HP pipe, 12"–60" in diameter, for right-of-way installations and under pavement. Governing standards and specifications include ASTM F2736 for dual wall sizes 12"–30" and ASTM F2764 for triple wall sizes 30"–60".

Superior Engineering & Durability:

SaniTite HP provides the strength needed for tough applications. Increased pipe stiffness meets, and for most sizes exceeds, the industry standard of 46 pii. SaniTite HP is manufactured using high impact polypropylene per ASTM D4101 resulting in superior abrasion and chemical resistance.

Advanced Sewer Applications:

SaniTite HP is applicable for a wide variety of gravity flow sanitary sewer applications. It is available in 12" to 60" diameters for greater flexibility in sanitary sewer design. A complete line of standard and custom fittings are readily available. SaniTite HP pipe is grey in color for easy post installation camera inspection.

Easy Installations:

The rugged, lightweight design of SaniTite HP makes it easier and more cost-effective to install. It requires fewer people, less time and less heavy equipment to install versus traditional materials. It all adds up to lower installation costs.

High Performance Joints:

SaniTite HP pipe is manufactured with dual ASTM F477 gaskets for increased joint performance and is lab tested to 15 psi.

Outstanding Value:

SaniTite HP pipe has many performance advantages over traditional pipe... at a fraction of the cost.
