

CITY OF PHOENIX APPROVES 54" and 60" ADS N-12® WT PIPE FOR RIGHT-OF-WAY

ENGINEERED TO OUTPERFORM

ADS N-12 Corrugated High Density Polyethylene (HDPE) pipe offers top-performance for drainage systems. The City of Phoenix now approves the use of 54" and 60" ADS N-12 WT pipe for right-of-way and under pavement applications. Governing standards and specifications include MAG (Maricopa Association of Governments) and the City of Phoenix supplements.

High Performance Joints:

ADS N-12 pipe is available with both soil-tight and water-tight joints that meet or exceed ASTM standards.

Outstanding Value:

N-12 pipe has many performance advantages over traditional pipe... at a fraction of the cost.

Superior Engineering:

N-12 pipe provides the strength needed for tough applications. It offers abrasion resistance and won't rust or corrode like concrete or steel.

Advanced Drainage Applications:

ADS N-12 pipe is used for cross drains, side drains, storm sewers, culverts, landfills and other installations across the country. It's available in a wide range of sizes from 4" to 60" diameters for flexibility in all your projects.

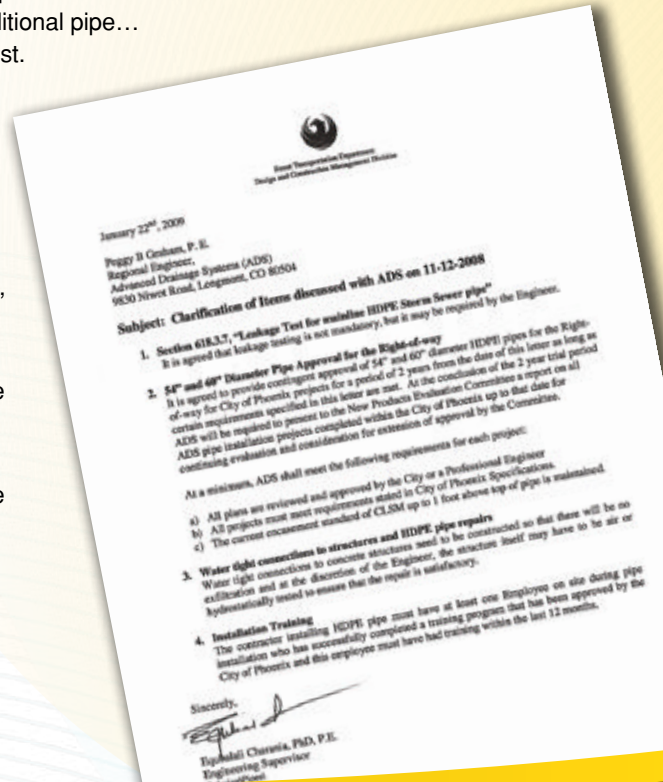

Easy Installations:

Its rugged, lightweight design makes N-12 easier and more cost-effective to install. It requires fewer people, less time and less heavy equipment to install compared to concrete pipe installations. It all adds up to lower installation costs.
