

# CITY OF BRAMPTON APPROVES ADS & HANCOR PIPE FOR STORM SEWER APPLICATIONS

## ENGINEERED TO OUTPERFORM

### Superior Engineering:

ADS & Hancor HDPE pipe provides the strength needed for tough applications. It offers abrasion resistance and won't rust or corrode like concrete and provide better durability than PVC.

### Advanced Drainage Applications:

ADS N-12 and Hancor dual wall pipe is used for cross drains, side drains, storm sewers, culverts, landfills and other installations across the country. They are especially useful in improving the service life of pavement by keeping the foundation free from water erosion. They are available in a wide range of sizes from 4" to 30" diameters for flexibility in all your projects.

### Easy Installations:

The rugged, lightweight design of HDPE pipe makes it easier and more cost-effective to install. It requires fewer people, less time and less heavy equipment to install compared to concrete pipe installations. It all adds up to lower installation costs.

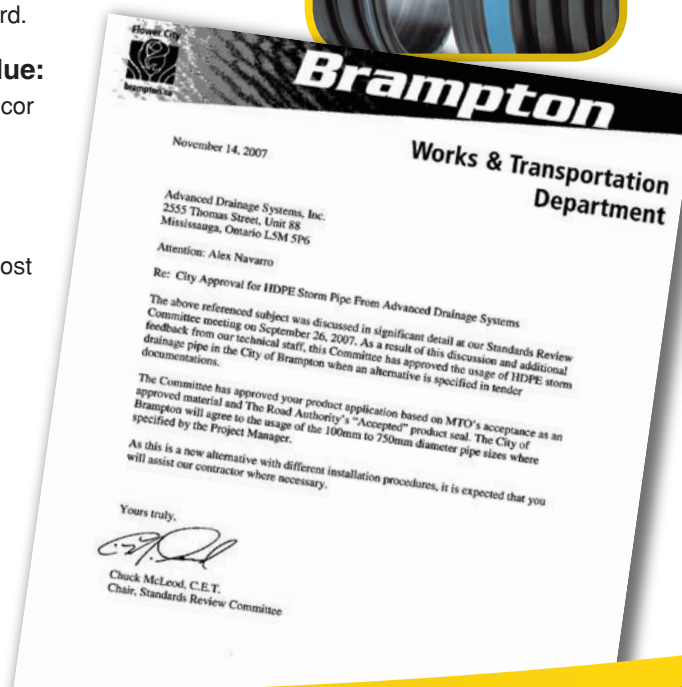

ADS N-12 and Hancor dual wall Corrugated High Density Polyethylene (HDPE) pipe offer top-performance for drainage systems. The City of Brampton's Department Engineering Design Works and Transportation now approves the use of ADS N-12 and the Hancor dual wall pipe up to 30 inches for storm sewer applications.

### High Performance Joints:

ADS and Hancor HDPE pipe is available with soil-tight, silt-tight or water-tight joints that are certified to meet the CSA B182.8 standard.

### Outstanding Value:

ADS N-12 and Hancor dual wall pipe have many performance advantages over traditional pipe... at a fraction of the cost
