Underground Stormwater Chambers

Save Valuable Land and
Protect Water Resources™

StormTech
Detention • Retention • Recharge
Subsurface Stormwater Management™
The advanced design of StormTech’s chambers allows stormwater professionals to create more profitable, environmentally sound installations. Compared with other subsurface systems, StormTech’s innovative chambers offer lower overall installed costs, superior design flexibility and enhanced long-term performance.

**Superior Design Flexibility for Optimal Land Use**

StormTech chambers are ideal for commercial, municipal and residential applications. One of the key advantages of the StormTech chamber system is design flexibility. StormTech chambers can be configured into beds or trenches, in centralized or decentralized layouts to fit on nearly any site.

**Product Features and Benefits**

The advanced features and innovative technology of StormTech chambers streamline installations while lowering overall installed costs. StormTech chambers offer these unique advantages:

- Lightweight, two people can install chambers quickly and easily, saving time and money
- Extensive product research & development and rigorous testing ensure long term reliability and performance
- Versatile product design accommodates a wide range of site constraints with cost-effective system designs
- The chamber length can be cut in 6.5" (165 mm) increments – reducing waste and optimizing the use of available space
- Injection molded polypropylene ensures precise control of wall thickness and product consistency
- Isolator Row – a patent pending technique to inexpensively enhance total suspended solids (TSS) removal and provide easy access for inspection and maintenance
- Corrugated Arch Design – a proven geometry for structural integrity under H-20 live loads and deep burial loads, also provides high storage capacity

**Typical Cross Section Detail (not to scale)**

The installed chamber system shall provide the load factors specified in the AASHTO LRFD Bridge Design Specifications Section 12.12 for earth and live loads, with consideration for impact and multiple vehicle presences.

- 3/4-2" (19-50 mm) CLEAN, CRUSHED, ANGULAR STONE
- ADS 601 GEOTEXTILE OR EQUAL

Granular Well Graded Soil/Aggregate Mixtures, <35% Finer. Compact in 6" (150 mm) Lifts to 95% Standard Proctor Density. See the Table of Acceptable Fill Materials.

**Call StormTech at 888.892.2694 for technical and product information or visit www.stormtech.com**
The StormTech SC-740 chamber optimizes storage volumes in relatively small footprints by providing 2.2 ft³/ft² (0.67 m³/m²) (minimum) of storage. This can decrease excavation, backfill and associated costs. The StormTech SC-310 chamber is ideal for systems requiring low-rise and wide-span solutions. The chamber allows the storage of large volumes, 1.3 ft³/ft² (0.4 m³/m²) (minimum), at minimum depths.

**StormTech SC-740 Chamber**

*This assumes a minimum of 6 inches (150 mm) of stone below, above and between chamber rows.
Advanced Structural Performance for Greater Long-Term Reliability

StormTech developed a state of the art chamber design through:

- Collaboration with world-renowned experts of buried drainage structures to develop and evaluate the structural testing program and product design

- Designing chambers to exceed American Association of State Highway and Transportation Officials (AASHTO) LRFD design specifications for HS-20 live loads and deep burial earth loads

- Subjecting the chambers to rigorous full scale testing, under severe loading conditions to verify the AASHTO safety factors for live load and deep burial applications

StormTech continues to conduct research and consult with outside experts to meet customer needs for alternative backfill materials, designs for special loadings and other technical solutions.

Technical Assistance

StormTech’s technical support staff is available to provide assistance to engineers, contractors and developers. Please contact one of our engineers or product managers to discuss your particular application. A wide variety of technical support material is available in print, electronic media or from our website at www.stormtech.com. For any questions, please call StormTech at 888-892-2694.
