SPECIAL ANNOUNCEMENT:

HANCOR SURE-LOK[®] PIPE NOW APPROVED IN LOUISVILLE FOR STORMWATER APPLICATIONS

BLUE STRIPE: LEADING THE WAY.

See details inside.

STRENGTH AND DURABILITY BY DESIGN

Hancor Sure-Lok Corrugated High Density Polyethylene (HDPE) Pipe is the ideal choice for roadway drainage systems. HDPE pipe is approved for Louisville and Jefferson County's stormwater applications.

ENGINEERED TO OUTPERFORM

SUPERIOR ENGINEERING:

Sure-Lok pipe is engineered to outperform and outlast traditional pipe materials. It offers abrasion resistance and won't rust or corrode like concrete or steel.

TYPICAL PRODUCT APPLICATIONS:

Hancor Sure-Lok pipe is used for cross drains, side drains, storm sewers, culverts, landfills and other installations across the country. It's available in a wide range of sizes from 4" to 60" diameters for flexibility in all your projects. The Louisville and Jefferson County Metropolitan Sewer District now approves Sure-Lok for stormwater applications.

EASY INSTALLATIONS:

Its rugged, lightweight design makes Sure-Lok easier and more cost-effective to install. It requires fewer people, less time and less heavy equipment to install compared to concrete pipe installations. It all adds up to lower installation costs.

HIGH PERFORMANCE JOINTS:

Hancor Sure-Lok and BLUE SEAL® pipes are available with both soil-tight and water-tight joints that meet or exceed ASTM standards.

OUTSTANDING VALUE:

Sure-Lok pipe has many performance advantages over traditional pipe... at a fraction of the cost.
