ENGINEERS IN IOWA KNOW A GOOD THING WHEN THEY SEE IT

See details inside.

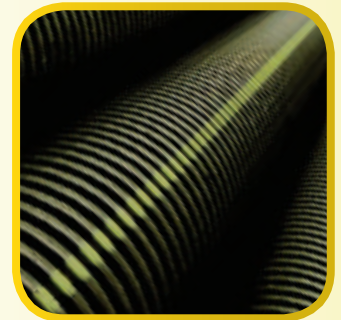

ADS AND HANCOR ARE STILL ON TOP OF THEIR GAME IN IOWA

DID YOU KNOW...

- ADS and Hancor are employee owned, US based companies. Our two plants in Iowa have manufactured HDPE pipe in the state for over 35 years. In 2006, these two plants produced over \$40 million dollars of pipe shipped across the state.
- In October of 2005, the Iowa Department of Transportation revised their Storm Sewer Specifications. Included in the revision is approval of high-density polyethylene (HDPE) pipe for cross road applications on roads with 3000 ADT and below. These changes allow the use of HDPE pipe as unclassified pipe at the Contractor's option on roads meeting the 3000 ADT requirement.
- HDPE pipe has a smooth interior and can therefore take advantage of improved hydraulic efficiencies. The outstanding durability of HDPE pipe results in maximum service life compared to corrugated metal pipe (CMP) storm sewers, and at costs significantly lower than those of reinforced concrete pipe (RCP).
- Dual wall HDPE pipe is available in diameters ranging from 4" through 60".
- There is over 1 billion feet of dual wall HDPE pipe currently in service across the country. Over 20% of that amount is installed inside the public right-of-way and under streets.
