

# LOS BANOS APPROVED HDPE PIPE FOR ALL STORM SEWER APPLICATIONS PUBLIC AND PRIVATE

## ENGINEERED TO OUTPERFORM

### Superior Engineering:

ADS and Hancor produce N-12® and BLUE SEAL® superior HDPE pipe that provides the strength needed for tough applications. These pipe products offer the best watertight joint in the industry. They offer abrasion resistance and won't rust or corrode like concrete or steel.

### Advanced Drainage Applications:

HDPE pipe and fittings are used for cross drains, side drains, storm sewers, culverts, landfills and other installations across the country. Pipe and fittings are available in a wide range of sizes from 4" to 60" diameters for flexibility in all your projects.

Advanced Drainage Systems®, N-12® and the Green Stripe are registered trademarks of Advanced Drainage Systems, Inc. Hancor® and BLUE SEAL® are registered trademarks of Hancor, Inc. © 2009 Advanced Drainage Systems, Inc. (09042) 2/09

On December 11th 2008, the City of Los Banos, Public Works Department approved HDPE pipe for all public and private storm sewers up to 60". This approval requires water-tight (WT) joints and Class I or II backfill, which is consistent with what is required for other pipe materials used in Los Banos. There is also an inspection requirement that will be paid for by the city including, TV and mandrel. The minimum cover in City ROW is 2.5'. All HDPE material approved by Los Banos shall conform to ASTM F2306 specifications.

### Easy Installations:

The rugged, lightweight design of N-12 and BLUE SEAL makes them easier and more cost-effective to install. They require fewer people, less time and less heavy equipment to install compared to traditional material installations. All of these advantages add up to lower installation costs.

### High Performance Joints:

The watertight joints on N-12 and BLUE SEAL pipe do not require any extra couplers, grout or other sealants due to the patented, factory-installed gaskets. The integral bell and spigot joints improve the tolerance control and integrity of the watertight seal.

### Outstanding Value:

N-12 and BLUE SEAL have many performance advantages over traditional pipes...at a fraction of the cost.

Nyloplast basin and N-12 pipe were recently installed at Los Banos High School.
